Reference Letter – Mpowered

Writer hereof wishes to confirm that Attacq Limited have engaged the services of Mpowered from about 2014 to present.

Attacq, due to the complexity of the group structure and large volume procurement through its development activities, required a system to manage and track its overall B-BBEE Strategy and in particular preferential procurement.

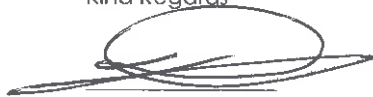

The Group engaged Mpowered for a solution that would enable it to adequately track its score, strategy, spend and assist with scenario planning. Mpowered recommended the BEEtoolkit and Supplier Management System.

The Supplier Management System in particular enabled the group to track B-BBEE Preferential Procurement Scores, spend, etc. at a consolidated and subsidiary level. The combination of the two solutions have proved an invaluable solution enabling more effective and accurate quarterly Board-level reporting and significantly reducing time spend during annual B-BBEE verifications.

Writer recommends Mpowered as I am of the opinion that the solutions offered by Mpowered are market leading and immensely beneficial.

Please don't hesitate to contact myself should you require any further information.

Kind Regards

Danny Vermeulen
Transformation Manager - Attacq
